Skills

Programming Languages: Java, JavaScript (ES6+), TypeScript

Frontend Development: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Web Design

Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Socket.io

Databases: MongoDB, MySQL, SQL

Developer Tools: Git, GitHub, Docker, CI/CD (GitHub Actions), Postman, VS Code, Vercel, Render, NPM

CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

Software Engineering: MVC Architecture, Client-Server Architecture, Authentication & Authorization, API Integration, SDLC

Artificial Intelligence: Gemini AI, Prompt Engineering, AI-Powered Application Development

Education

Madhu Vachaspati Institute of Engineering and Technology, Prayagraj

2022 – 2026

Bachelor of Technology in Computer Science Engineering

CGPA: 7.5/10

Experience

MERN Stack Developer Intern | Softpro India, Lucknow

Sep 2024 – Nov 2024

- Built responsive React.js and Tailwind CSS interfaces using component-based, reusable UI patterns across the application.
- Built and consumed 10+ RESTful API endpoints with Node.js and Express.js, covering routing, middleware, validation, and response formatting.
- Implemented JWT authentication from scratch — registration, login, token verification middleware, and role-based route protection.
- Designed MongoDB schemas with validation rules and built CRUD operations with filtering, sorting, and pagination for efficient data access.
- Collaborated using Git and GitHub with branches and pull requests to maintain a clean, trackable codebase.

Projects

AI Customer Support SaaS Chatbot — *Next.js, MongoDB, Gemini AI, ScaleKit, Tailwind CSS*

[GitHub](#) [Live](#)

- Built a SaaS platform letting businesses embed an AI support chatbot via a single script tag; Gemini AI reads business FAQs to answer customer queries in real time.
- Implemented ScaleKit SSO authentication and an admin dashboard for managing the knowledge base, with MongoDB Atlas for persistent storage.
- Added voice chat using the Web Speech API so customers can speak queries and receive spoken AI replies; deployed on Vercel.

AI-Powered Hospital Management System — *MERN, Socket.io, Gemini AI, Better Auth*

[GitHub](#) [Live](#)

- Built a hospital management platform with 4 role-based logins (admin, doctor, nurse, patient); Gemini AI auto-assigns doctors/nurses to new patients and analyzes uploaded X-rays for reports.
- Implemented real-time updates with Socket.io and background job processing with Inngest, plus an integrated online billing/payments system.
- Added search/filter and dark-light mode; built fully responsive UI across devices and deployed live on Vercel.

TradeVista — Stock Trading Platform — *React.js, Node.js, Express.js, MongoDB*

[GitHub](#) [Live](#)

- Built a full-stack stock trading platform with a live dashboard showing real-time prices, holdings, orders, and account balance.
- Developed the frontend in React.js and a secure Node.js/Express.js backend handling authentication and trading data, backed by MongoDB.
- Designed a fully responsive UI across mobile, tablet, and desktop; deployed live using Vercel, Render, and MongoDB Atlas.

Certifications & Achievements

- MERN Stack Summer Training — Softpro India: hands-on training covering React.js, Node.js, Express.js, and MongoDB through guided projects.
- Web Technologies Training — Softpro India: covered HTML5, CSS3, JavaScript, and responsive design fundamentals.
- Data Structures and Algorithms — Apna College: Java-based DSA course covering arrays, linked lists, trees, and dynamic programming.
